## iPhone 14 Pro - Here's What We Have Found Out So Far!

We've seen lots of leaks and rumours about what might be in store for the iPhone 14, which is anticipated in a few months if Apple adheres to its typical schedule. In summary, it appears that the iPhone 14 release will be thrilling – with a few limitations.

**Apple's iPhone 14 Pro Max 2022** is expected to be the phone that shakes up the iPhone lineup by introducing a design that is significantly different from the iPhone 13 Pro. So far, speculations about the **iPhone 14 pro max design & feature** have suggested everything from the notch's demise to the return of Touch ID.

---

Faced with tough competition from the Samsung Galaxy S22 Ultra and the Google Pixel 6 Pro, it appears that Apple will have to up its game with the **iPhone 14 Pro 2022**. Thankfully, based on current leaks and reports, Apple's upcoming Pro model seems to be doing precisely that. And the **iPhone 14 Pro 2022** may differ significantly from other iPhone 14 versions.

The iPhone 13's triumph has piqued the interest of Apple fans and tech enthusiasts all around the world. As a result, the next generation of iPhones has been the subject of various leaks and rumors. These have been compiled to pique your interest!

## iPhone 14 Pro - The Design

Apple is rumored to be mulling a new design for the **iPhone 14 series 2022**. A trio of cameras could be one of the most extensive upgrades for the **iPhone 14 Pro design and feature**. The iPhone 14 Pro's raised camera array is back, and it's much more prominent; the new phones are also expected to be 0.2mm thicker than the iPhone 13 Pro and iPhone 13 Pro Max. Apple may finally be ditching the notch in favor of a camera of the punch-hole kind. However, this may be confined to the two 'Pro' variants. The iPhone 14 may have a larger body, which will assist in reducing the rear camera bulge seen on previous iPhone models. The forthcoming iPhone 14 series could have a titanium frame, and Apple could use a new vapor chamber thermal technology to improve heat dissipation.

## iPhone 14 Pro - The Display

The 120Hz ProMotion display technology will be supported by the two **iPhone 14 Pro 2022 versions**, and speculations suggest that ProMotion will remain a feature reserved for the more costly iPhone models. Though there have been reports that 120Hz refresh rates could be implemented in all iPhone 14 models, many display analysts believe this is unlikely due to display availability difficulties. According to current speculations, the

**iPhone 14 Pro 2022** will retain its 6.1-inch display, while the **iPhone 14 Pro Max 2022** will keep its 6.7-inch display. There will also be an iPhone 14 Max, which will replace the mini and have the same screen specs as the mini but with a 60Hz refresh rate.

## iPhone 14 Pro - The Colour

Both the iPhone 14 and iPhone 14 Pro models will be available in purple hue with a unique texture that shifts in hue based on varying illumination, according to a report. If the purple rumor is true, Apple has previously utilized the same color for the standard iPhone and Pro models, but in different shades, which might be what we see in 2022. In addition, the iPhone 14 and 14 Max are expected to be offered in black, white, blue, red, and purple, with graphite, gold, silver, and purple for the **iPhone 14 Pro and iPhone 14 Pro Max**.

## iPhone 14 Pro - The Cameras

The iPhone 14 Pro is expected to keep the typical combination of a main, ultrawide, and telephoto array, so don't expect a significant change in the number of cameras. According to rumors, the iPhone 14 will have a 48MP sensor capable of shooting 8K video. If that's the case, the rest of the phones on the list of the [best camera phones in 2022](#) should start making room for the iPhone 14. There's also the possibility of a zoom boost for the telephoto camera since an Apple patent suggests the company is working on a periscope-style zoom camera. If such a function were to be introduced in an iPhone, it would be with the iPhone 14 Pro.

## iPhone 14 Pro - The Specs

The iPhone 14 will very certainly include a new chipset, most likely designated the A16 or A16 Bionic. The 5nm approach, on the other hand, may be employed again. The iPhone 14 Pro will also include 8GB of RAM, according to a recent leak. Because Apple's efficiency approach has allowed it to do more with less RAM than the Samsung Galaxy S22 Ultra, adding more RAM to the iPhone 14 Pro might turn it into a true powerhouse. Finally, it appears that one feature that fans have been clamoring for - USB-C - may not make it into the iPhone 14. Instead, the iPhone 14 Pro may get the ability to connect to satellite networks in addition to cellular and Wi-Fi connectivity. That's a feature that initially surfaced in the run-up to the iPhone 13's release last year.

## iPhone 14 Pro - The Battery

There have been no reports on battery size or capacity. However, we're optimistic that the iPhone 14 Pro's data storage will match or exceed that of the iPhone 13 Pro. With one source claiming that it will be more prominent in future generations and another claiming that the phones would be thicker – perhaps allowing for a larger battery – the possibilities of a better battery appear to be very strong.

In 2022, Apple will release four flagship iPhones, with the iPhone 14 Pro variants available alongside the more economical **iPhone 14 and iPhone 14 Max models**. If you are looking for an unmatched iPhone experience and are on the verge of ditching your old smartphone and switching to a much smarter one, you can either choose one from the iPhone 13 series. The **best place to buy an iPhone** is the eCommerce websites during the sale seasons. On the other hand, if you are high on patience and willing to embrace an upgraded innovation, wait and see what surprises iPhone 14 Pro holds for you in the upcoming launch event!
